SUMMARY

I am a passionate web developer who focuses on building clean, scalable, and user-friendly applications. I enjoy turning ideas into real products through code and continuously improving my skills by learning new technologies. Besides technical skills, I value how I work – managing time effectively, collaborating with teams, staying persistent, and researching deeply to deliver the best possible solutions.

EDUCATION

Nam Can Tho University

Information Technology

2018 – 2022 | Can Tho, Viet Nam

- GPA: 3.5/4.0
- English: Basic communication

SOFT SKILLS

- Teamwork, proactive learning
- Time management, research and testing of new technologies

TECHNICAL SKILLS

Languages: Java, C#, TypeScript
Frontend: NextJS, Redux, React Query, Tailwind Bootstrap, SCSS
Backend: Spring Boot, Node.js, Microservices
Database: PostgreSQL, MySQL, SQL Server, MongoDB
Tools: Git, GitHub, GitLab, Storybook

WORK EXPERIENCE

HRCV VIETNAM COMPANY LIMITED

Lead Frontend Developer

03/2026 – Present

As the Lead Frontend Developer at HRCV, I led the frontend development of the HRCV recruitment platform, transforming the product from concept to production. I was responsible for the frontend architecture, technical direction, development standards, and delivering a fast, scalable, and user-friendly experience for both job seekers and employers.

Key Responsibilities

- Led the frontend design and development of the HRCV recruitment platform from the ground up.
- Designed and implemented a scalable, maintainable frontend architecture.
- Built core recruitment features for candidates, employers, and administrators.
- Collaborated closely with product managers, designers, and backend engineers to translate business requirements into intuitive user experiences.
- Optimized application performance, SEO, accessibility, and Core Web Vitals.
- Integrated REST APIs, authentication, AI-powered features, payment services, and third-party platforms.
- Established frontend coding standards, reusable component libraries, code review processes, and best practices to ensure code quality and maintainability.
- Mentored team members and provided technical guidance throughout the development lifecycle.
- Researched and adopted modern frontend technologies to continuously improve product quality and developer productivity.

Key Achievements

- Successfully led the frontend development of the HRCV recruitment platform from idea to production.
- Built a scalable frontend architecture that supports long-term product growth.
- Improved website performance, SEO, and user engagement through technical optimization.
- Delivered a modern, responsive, and accessible user experience across desktop and mobile devices.
- Played a key role in technical decision-making and frontend architecture throughout the product development lifecycle.

Vinpet Solution

Full-Stack Developer

05/2025 – Present

- Participate in developing the company's official website: vinpetsolution.com
- Use **Next.js** and **Tailwind CSS** throughout the development process of the company's operations
- Build and deploy Dashboard-related projects, support data management and optimize administrative experience.
- Optimize components in the source code to improve loading speed and overall performance of the application.
- Collaborate with backend developers to develop the most optimal solution for the system.
- Use **Node.js** as the backbone for the project and build the backend together with the rest of the team.
- Develop exception handling for each individual error via Global exception.

Tinda (Freelance)

Front-end Developer

09/2025 – 12/2025

- Build and develop Admin Dashboard for Tinda Project use technologies such as **NextJs, ReactQuery, Tailwind CSS, Axios**.
- Develop a feature to export user CVs as PDFs using a client-provided template.
- Optimize cache data processing for the project, and build reusable components.
- Build code structure that makes it easy to develop new features.
- Synchronize data structure and connect tightly with the backend.

FPT IS

Intern Full-Stack Developer

02/2025 – 05/2025

- Experience in the design of a Chronic Disease Examination System in **FHIR/HL7** (medical) standards, **Microservice** architecture Develop Dashboard interface using **ReactJS (TypeScript)** and **Redux**.
- Optimized code, database and build system functions and processes
- Develop Spring Boot, PostgreSQL skills, coordination with other team members

VIETGAME

Game Developer

10/2022 – 02/2023

- Piggy Game Development – Spin and Win Game
- Built interface and effects using Starling (ActionScript) according to design
- Optimized code and system to improve game performance
